The Moravian College ACM is hosting its third annual computer science celebration on **March 29, 2014**. The purpose of this event is for undergraduate computer science students in the Lehigh Valley to meet each other, present their work, and network with area industry professionals.

Admission is **free** and a catered breakfast, lunch, and dinner will be provided, along with snacks throughout the day courtesy of Moravian's ACM Chapter and industry sponsors.

We are currently seeking students to present their work via a **poster or short talk**. The target audience is your fellow students; this is an opportunity to share your passion in a fun and casual environment. To present your work, please email a brief abstract describing your project and your desired presentation venue (talk or poster) by **March 22, 2014**.

During the presentation period there will be community representatives to interact with the attendees. This will provide a venue to network with local business.

In the afternoon there will be a **programming contest** aimed at all levels of experience. Unlike other contests, you'll be free to use your own environment and any other resource you desire (including online resources). We want this to be a fun experience! To register a team of 1-3 students, please email a list of team members by **March 22, 2014**.

To register as an attendee, please email by **March 22, 2014**.

Moravian College encourages persons with disabilities to participate in its programs and activities. If you anticipate needing any type of accommodation or have questions about the physical access provided, please contact the event coordinator Dr. Ben Coleman (coleman@cs.moravian.edu) or call (610-861-1335).
